

**Amendments to the Specification**

Please replace paragraph 30 on page 9, with the following rewritten paragraph:

[0030] FIG. 6A illustrates logic for an index build process in accordance with certain implementations of the invention. FIG. 6B illustrates, in a block diagram, a high-level flow of an index build process in accordance with certain implementations of the invention. In FIG. 6A, control begins at block 600 and documents that are to be indexed by the search engine 130 are obtained. In certain implementations, the documents are published or pushed (e.g., as may be the case with newspaper articles) to the indexing component 142. In certain implementations, the crawler component 132 discovers, fetches, and stores the documents. At a subsequent time, in block 602, the crawler component 132, discovers, fetches, [[ad]] and stores new documents in delta store 230.

Please replace paragraph 37 on page 11, with the following rewritten paragraph:

[0037] FIG. 7A illustrates logic for an index build process in accordance with certain alternative implementations of the invention. FIG. 7B illustrates, in a block diagram, a high-level flow of an index build process in accordance with certain alternative implementations of the invention. In FIG. 7A, control begins at block 700 with the crawler component 132 discovering, fetching, and storing documents in store 210. At a subsequent time, in block 702, the crawler component 132, discovers, fetches, [[ad]] and stores new documents in delta store 230.
